**Staff:** Debra Susie, Ph.D., Executive Director  
Ebony Yarbrough, Child Nutrition Coordinator  
Marcus Finley, Program Assistant  
Sara Guiffre, VISTA Project Assistant  
Fely Curva, Lobbyist

**“Feeding Florida” Production Team –**  
Research: James Windrem (intern) and Marcus Finley  
Harvest Printing & Copy Center, Inc., Tallahassee, Florida

**Board of Directors:**

Dick Batchelor, Dick Batchelor Management Group (Orlando)  
Rev. Melvin Bell, Stewart Memorial AME Church (Perry)  
Rev. Clarke Campbell-Evans, United Methodist Church (Florida Conference)  
Michael Farver, End Childhood Hunger, Inc. (Ft. Lauderdale)  
Liz Gutierrez, Palm River Point CDC (Tampa)  
Yvonne McDonald, Coconut Grove Family and Youth Intervention Center  
Doris Reeves-Lipscomb, Groups-That-Work (Pinellas County)  
Cantor Tanya Tamarkin, Temple Israel (Tallahassee)  
Pastor James Williams, Franklin County Ministerial Alliance

**We appreciate the support of the following sponsor-level funders:**

Central Florida Presbytery  
Evangelical Lutheran Church in America (Florida-Bahamas Synod)  
Farver Foundation  
First Presbyterian Church, Tallahassee  
Florida Association of Jewish Federations  
Food Research and Action Center  
Lutheran Church-Missouri Synod (Florida-Georgia District and National Domestic Programs)  
MAZON: A Jewish Response to Hunger  
Oak Tree Foundation  
Presbyterian Hunger Program  
Publix Super Markets Charities  
Share Our Strength: Taste of the Nation  
Share Our Strength: Great American Bake Sale  
Southeast Anti-Hunger Consortium  
Taste of the NFL  
United Methodist Church (Florida Conference)  
United Methodist Women (Florida Conference)  
United Parcel Foundation

Dear Friends –

As Florida Impact prepares for its launch of the Florida Partnership to End Childhood Hunger, the best place to start is with the reality of numbers – the number of Florida’s children in poverty and at risk of hunger; the number of families not using the food stamp benefits or the Earned Income Tax Credits for which they are eligible; the number of children in need and still not showing up for summer programs that promise secure, supervised settings for recreation and learning along with the nutritional meals they lose when school is out. And the numbers aren’t good.

**All total, Florida left over \$1 billion in federal dollars on the table for just *three* of the federal food and nutrition programs** that could have nourished Florida’s children from low-income families. Instead it remained in Washington, far from those for whom it was intended.

What we also know, however, is that a concerted effort to remove the barriers to and promote awareness of these programs does increase participation, which subsequently generates a downward trend on the numbers of children at risk of hunger. For example, Florida Impact operated a statewide, bilingual Food Stamp Help-line for six years; and over 68,000 families used it. During that same period – thanks to this and other aggressive outreach strategies--the state experienced a 37 percent increase in food stamp participation and was among the top four states in which household food *security* went up!

I am pleased to commend to you the biennial “Feeding Florida” report with an added feature that tracks the amount of federal dollars each county is losing out on in many of the programs. If we work to channel more of these federal dollars into our communities by removing barriers to access and promoting awareness, we could effectively end hunger among the children of our state.

Debra A. Susie, Ph.D.  
Executive Director

## **Federal Tools for Fighting Hunger**

### **National School Lunch Program**

The National School Lunch Program (NSLP) was created by Congress in 1946 as a “measure of national security” when an investigation into the health of young men rejected in the World War II draft showed a connection between physical deficiencies and childhood malnutrition. Now, through the NSLP, all public and non-profit, private schools receive per-meal cash reimbursements, as a federal entitlement, thus providing nutritious meals to the broadest range of American children. Children from low-income families are provided meals at a free or reduced rate depending on their income: those at or below 130 percent of the poverty level are eligible for free meals; those with incomes between 130 percent and 185 percent, for reduced-price meals. School lunch provides school children with one-third or more of their Recommended Dietary Allowance (RDA) for key nutrients; and USDA research indicates that children who participate in this program have superior nutritional intakes compared to those who do not. Over 30 million children sat down to lunch at school cafeterias across this country in the 2005-06 school year. And on a typical school day in Florida, two out of every three of the over 1.3 million school children who participate in the NSLP qualify for free-and-reduced price meals.<sup>17</sup>

### **School Breakfast Program**

Most schools have recognized for a long time the benefits of serving lunch to students but have been slower to realize the importance of serving breakfast. Created as a pilot in 1966 and first permanently authorized in 1975, the School Breakfast Program (SBP) offers essential support to students. Today’s long commuting patterns and varied work schedules mean that many children or parents leave home hours before school starts. A good breakfast is vital for these children to be alert and ready to learn. Florida is second in the nation for its high percentage of schools participating in the SBP. Impact was able to get the state to mandate the School Breakfast Program in all elementary schools in 1989. Despite this, of the 888,414 schoolchildren who participated in free or reduced-price lunch in 2005-06, only 392,949 (less than half) also participated in school breakfast. That means nearly half a million eligible students are not getting these meals. Every child deserves an equal opportunity to succeed in school. Numerous studies document the positive effect school breakfast has on hunger, health and nutrition, classroom behavior, test scores, grades, and school attendance and tardiness. Successful school outcomes are enhanced by increased participation in the School Breakfast Program.

### **Child and Adult Care Food Program**

The USDA’s Child and Adult Care Food Program (CACFP) plays a vital role in improving the quality of day care and making it more affordable for many low-income families. Each day, approximately 150,000 children receive nutritious meals and snacks through Florida’s child care centers, Head Start programs, family childcare homes, homeless and domestic violence shelters, and after-school programs. The Program also provided just fewer than 2 million meals to Floridians who receive care in nonresidential adult daycare centers in 2006. Independent centers and sponsoring organizations receive cash reimbursements for serving meals that meet federal nutritional guidelines to enrolled children and adults. In Florida, the Child Care portion of the program is administered by the Department of Health while the Department of Elder

Affairs handles the Adult Care Food Program. Good nutrition and quality care are essential to the healthy development of preschool children. The CACFP promotes both – allowing children to develop fully, preparing children to enter school ready to learn, and helping working families work.

### **Special Supplemental Nutrition Program for Women, Infants, and Children (WIC)**

The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) is a federally funded preventive nutrition program that provides supplemental foods, nutrition counseling and education, and health care access to low-income pregnant women, new mothers, infants, and children under five at nutritional risk. WIC provides vouchers to buy foods that are rich in protein, iron, calcium, vitamins A and C, and folic acid. These are all key nutrients for the health of women and children that are often lacking in the diets of low-income people. Along with providing the means to obtain these foods, WIC educates mothers about the relationship between nutrition and health. Research continually shows that good nutrition during pregnancy and early childhood has a positive impact on health and development. WIC children enter school ready to learn and have better cognitive performance. In addition, WIC increases birth weight and decreases neonatal deaths and premature infants. Unlike many of the other programs in this report, WIC does not enjoy “entitlement” status; however, Florida is now serving almost 75% of the estimated eligible population, and participation exceeded 400,000 for the first time in September (2006).

### **Food Stamp Program**

The Food Stamp Program (FSP) is one of the most important national defenses against hunger. Food stamps provide benefits that can be used to buy food at authorized grocery stores and allow low-income households to obtain a nutritious diet. In addition, the benefits help hardworking people stretch their monthly income by freeing up resources, so families do not have to make choices between buying food or paying rent and utilities, or between feeding their children and getting access to medical care. Households with children receive nearly 80% of all food stamp benefits in the U. S. While helping to combat food insecurity, food stamps can also bring in federal dollars to boost local and state economies. In FY2005-06 alone, nearly \$1.4 billion was issued to Florida food stamp recipients. Such a large multiplier effect generates an important economic stimulus to the state’s economy.

### **Summer Nutrition Programs**

The Summer Food Service Program (SFSP) was established by Congress in 1968 to provide meals to children when schools are closed for vacation. Operated nationally by the U.S. Department of Agriculture and administered in Florida by the Department of Education, the summer nutrition programs can be run by schools, parks, churches, community centers, and other nonprofit organizations. Summer meals serve as the anchor around which summer education, literacy, recreation, and violence prevention activities are built. SFSP maintains nutritional continuity for hungry children, strengthens public and private non-profit summer programs, and assists the healthy growth and development of low-income children, ensuring they are ready to learn in the new school year.

## End Notes

### Food Insecurity:

Since 1995, the U.S. Department of Agriculture (USDA) has collected information annually on food spending, food access and adequacy, and sources of food assistance for the U.S. population. The information is collected in an annual food security survey, conducted as a supplement to the nationally representative Current Population Survey (CPS). A major impetus for this data collection is to provide information about the prevalence and severity of food insecurity in U.S. households. USDA reports in the Measuring Food Security in the United States series have summarized the findings of this research for each year from 1995 to 2004. <http://www.ers.usda.gov/publications/err29/>

County-Level Food Insecurity: The Community Childhood Hunger Identification Project, one of the pioneer studies on hunger in America and forerunner to the USDA food security measure, used race, number of children, family income, and urban/rural residence as predictors of childhood hunger. Of the four, family income measured as a percentage of the poverty level was found to be the single most useful characteristic for predicting whether a family would be hungry or not. Feeding Florida uses poverty as a predictor of food insecurity, calculating Florida's ratio of food insecurity to its poverty rate and applying that formula in each county.

### Demographics:

From U.S. Census Bureau website, *Geographic Comparison Table-P14: Income and Poverty in 1999: 2000*. Per Capita Income (2000) for each county and the state is the total income of all persons over 15 years of age in a given area divided by the total population in a given area.

Poverty Data - Small Area Income and Poverty Estimates (SAIPE), Department of Commerce, Bureau of the Census, 2002. The U.S. Census Bureau, with support from other Federal agencies, created the Small Area Income and Poverty Estimates (SAIPE) program to provide more current estimates of selected income and poverty statistics than the most recent decennial census. Unlike the household poverty numbers used to calculate food insecurity in this report, only demographic data for individuals is given in the SAIPE estimates shown here. These estimates are based on statistical models that use decennial census data, household survey data, administrative records data, and population estimates. Since these are statistical estimates they contain error; that is, the estimates will not be exactly equal to the "true" median income or "true" poverty numbers or rates. Such "true" values are generally impossible to determine.

### Food Stamp Program:

Florida Department of Children and Families, Economic Self-Sufficiency Technology Unit. Average monthly participation, number of households, and issuance per person were calculated for the 2005-2006 fiscal year (July, 2005 – June, 2006). The estimated percent of eligible persons participating is based on the number of individuals at 100% of the poverty level according to the Small Area Income and Poverty Estimates (SAIPE, 2003). This is a conservative estimate of eligible persons, as individuals with gross incomes up to 130% of poverty (among other asset limitations) are potentially eligible.

To estimate annual "Federal Dollars Unused," the average monthly issuance per participant was multiplied by 12, and resulting product was multiplied by an estimate of the number of people in poverty who were not participating in the Food Stamp Program. To obtain this estimate, the percentage of the population in poverty in 2003 (estimated for each county by SAIPE) was applied to the total population in 2005 (estimated by the U.S. Census Bureau).

### National School Breakfast Program:

State level average daily participation (ADP) stats include all provider type subtotals, public and private. County level ADA stats include only public schools, minus sponsors at state-administered university (FAMU, FAU, FSU).

ADP 'Free', 'Reduced Price', and 'Paid' represent sums of free, reduced price, and paid 'Breakfasts' and 'Severe Need Breakfasts' for the state and each county. All figures divided by 180 (Florida's number of school days in 2005-06 school year) to obtain average daily participation.

To estimate what percent of eligibles participated, divide the number of free & reduced students in NSBP by the number of free & reduced students in NSLP and multiple by 100 to obtain percentage.

Multiplying [(Free NSLP#) – (Free NSBP#)](\$1.27)(180) + [(Reduced NSLP#) – (Reduced NSBP#)](\$0.97)(180) will give you the unused federal dollars for each county.

### **National School Lunch Program:**

Florida Department of Education, Food and Nutrition Management. All data is reported for school year 2005-2006. County-level average daily participation only includes estimates from public schools. State-level average daily participation includes all providers, public and private.

### **Summer Food Service Programs:**

Florida Department of Education, Food and Nutrition Management, Summer Food Service Program (SFSP). "First meals" and reimbursement figures for lunch from SFSP sites and SFSP Seamless Waiver sites are taken from Florida Department of Education report #SfsRpt2004. Participation and Reimbursement. Numbers shown are for fiscal year 2006 (October, 2005 – September, 2006). First lunches are given, as they serve as the best single indicator of overall participation when compared to any other single meal or to average daily participation figures. Additional children receiving SFSP breakfasts, snacks, or suppers are not captured in this data.

To calculate the number of eligibles served, a rate of attendance at SFSP sites in summer of 2006 as a percentage of the total number of children who qualified for free and reduced-price meals in the 2005-2006 school year is given. This estimate is made conservatively, as it corresponds to the number of school-aged children (5 to 17 years) projected to live in families in poverty by the U.S. Census Bureau, Small Area Income and Poverty Estimates. These participation figures were used in calculating "unused federal dollars" figures.

Reimbursement rates for SFSP lunches are adjusted annually, and averaged \$2.78 in 2006 according to USDA, Food and Nutrition Management. Adjustments for 2006 are based on the 3.2 percent increase in the *Food away from home* series of the Consumer Price Index for All Urban Consumers for the period November 2004 through November 2005.

---

<sup>1</sup>Data may not capture SFSP meals served to children in this county by sponsors outside the county, i.e., some summer food sites are sponsored by school districts or other nonprofits in neighboring counties.

### **Special Supplemental Nutrition Program for Women, Infants, and Children (WIC):**

Florida Department of Health, WIC and Nutrition Services. "WIC Participation for September 2006 based on County of Residence" reflects the number of women, infants, and children enrolled in WIC, based on their county of residence, for the month of September 2006. This month's data best represents the annual participation for WIC services, and is less influenced by clients receiving services in other counties besides their own. The Florida Department of Health, WIC and Nutrition Services estimates the number of potentially eligible participants in each county based on figures including live birth statistics, population projections, and by applying the county poverty factor.

---

<sup>2</sup>When WIC participants receive services in other counties, the "Percent of potentially eligible persons served" will be higher than the "Potentially Eligible Persons."

## Celebrate Florida Impact In its 28th Year!

Since 1979, Florida Impact has been dedicated to reducing hunger and poverty in Florida. Impact educates and enlists the people of Florida to secure justice for and with those whose economic rights have not been realized. We also work to increase access to food programs by conducting aggressive outreach strategies and public policy advocacy. Through your generous support we can continue to inspire the people of Florida to do justice.
